

ATIP-AVENIR PROGRAM

Since 2005, the Fondation Bettencourt Schueller has been a partner of Inserm's Avenir program. In 2009, it also partnered with the CNRS ATIP program, which helps top-level young researchers with outstanding research projects who wish to create their own team to return or move to France. The ATIP-Avenir program has become synonymous with excellence, providing a springboard for laureates to obtain further funding. The grant amounts to €300,000 over 3 years, in addition to Inserm and CNRS funding.

The ATIP-Avenir grant is exclusively open to researchers meeting the following criteria:

- Being a **laureate of the ATIP-Avenir program in 2026**,
- Specializing in **life sciences**,
- Having identified a **host laboratory in France**,
- Being invited to apply by the Fondation Bettencourt Schueller.

The application procedure is divided into two phases :

- **Submission of the application form** between July 28st and September 2nd, 2026,
- **Audition by the Foundation's scientific council** on September 30th, 2026.

The Scientific Committee's decisions are final and confidential and not subject to any challenges or appeals of any nature by the candidate, as acknowledged by the candidate when submitting an application.

Before starting your application, **please carefully read the useful information** (link in the French version of this text).

If you have any problems creating your account, completing your application or have any questions about the grant, please contact sciences@fondationbs.org.
